

Aztech 700WR-3G – 3G/LTE failover

1. Log into the modem's web interface by entering 10.0.0.2 in the address bar of an Internet browser. The default username and password are *admin* and *admin*.
2. Click on Advanced Mode at the top of the page.
3. Click on Network and then Internet.
4. Next to Internet Connection click the Mobile Broadband radio button.
5. Change the APN setting to TelkomInternet.

The screenshot displays the Aztech web interface. At the top left is the 'Aztech' logo. Below it are links for 'Basic Mode', 'Reboot', and 'Logout'. The date and time '8/31/2015, 2:40:48 PM' are shown in the top right. A navigation bar contains icons for 'Network', 'Wireless', 'Applications', 'System', and 'Status'. Below this is a secondary menu with 'Local', 'Internet', 'ADSL', 'QoS', 'Management', 'Routing', 'MAC-IP Reservation', and 'Auto Wan Fail Over'. The main content area is titled 'Network->Internet [Help]'. It features a form for 'Internet Connection' with the following fields and options:

- Internet Connection: Mobile Broadband ADSL Ethernet WAN
- 3G Access Point Settings: List Manual
- APN (Access Point Name):
- Authentication Method: Auto PAP CHAP
- Dial Number:
- Username:
- Password:
- SIM PIN:

An 'Apply' button is located at the bottom of the form.

6. Click the Apply button.
