Let’s connect you.
The Telkom Easy Guide to set up your D-Link DSL 2750U Router.
First, unpack your new router.

1. Your D-Link DSL Router
2. The quick reference guide
3. 2 external antennae
4. 1 power supply cord
5. 1 LAN cable
6. 2 telephone cables
Let's get started.

1. Connect the 12vDC power supply into your router and into a power socket.

2. Plug one end of the grey cable into the power supply port marked IN and the other end into the telephone jack on the wall.

3. Plug the red cable from power supply marked OUT into the red socket on the back of router marked DSL.

4. Plug the yellow LAN cable into the yellow port on the router and the other end into the LAN port on your computer.
Setting up the Router.

1. Open your internet browser and go to http://10.0.0.2 and click Enter. Type in admin for both the username and password. Click Login.

2. From the D-Link page that loads, click Status to see whether the router is configured.

3. If your router is not online and not configured click Setup > Setup Wizard.
Almost there...

4. Change the password to your preferred password. Click Next on the Time and Date page. There is no need to change these.

5. Select South Africa from the country dropdown and Telkom as your Internet Services Provider. Enter the username and password that were SMS’d to you and click Next.

6. Enter your preferred name for your WiFi network, and your password. Check the Summary page and click Apply.
Last few steps.

7 If you were accessing the router via WiFi up to this point, you will need to reconnect to the router using the new WiFi name and password. It is important to log out properly by clicking Logout.

8 Activate your internet account by typing www.telkom.co.za/verifyadsl to the address field of your internet browser. Press Enter. Complete the fields with your telephone number and order number and click on Submit.
No connection? Don’t panic...

1. Plug your dongle into the back of your router.
Setting up the Dongle.

1. Open your web browser and go to http://10.0.0.2. Type in admin as your username and your new password, if you changed it. Otherwise use the default admin password. Click 3G Internet Setup.

2. Click Add.

3. Click Auto Settings.
Last few steps.

4. Click Apply/Save.

5. Click 3G Internet Setup from the left navigation menu to refresh the page, and if your SIM card requires a pin, click the Pin Manage button.

6. Enter the SIM's Pin and click Submit.
Done.
You’re connected.
