Let's connect you.

The Telkom Easy Guide to set up your Huawei Wi-Fi Extender.
First, unpack your new Wi-Fi Extender.

1. The quick reference guide
2. Safety information
3. Your Huawei Wi-Fi Extender
Switch your router on by pressing the power button on the side of the router.
Let’s get started.

1. Plug the Wi-Fi Extender into a power socket. Make sure that this is close to your Wi-Fi router, and that your router is switched on for easy setup.

2. The centre LED button will flash red for a few seconds before turning blue. When blue you can begin the configuration.
Connect your computer to the Extender via Wi-Fi.

Make sure that you have switched on your Wi-Fi on your computer. Click on the Wi-Fi icon in the system tray and select Wi-Fi Network HUAWEI-****** (e.g. HUAWEI-DRGNWF).

Type in the Wi-Fi password that you will find on the back of the Wi-Fi Extender. Click Join.

Open your internet browser and go to http://mediarouter.home (or 192.168.33.1)

Type in admin for both the username and password and click Login.
Getting there...

4. Select the middle tab for Wi-Fi Repeater.

5. Click Next to confirm your selection.

6. Click Scan and the extender will search for the Wi-Fi router.
Select the Wi-Fi signal that you want to connect to, and type your password into the **Key** field. Click **Connect**.

The extender and router will now connect. You will see a **Congratulations** message once they are connected.

Your Wi-Fi extender will now have blue inner arcs, and just above, bigger green arcs to show signal strength.
Last few steps...

10 Click **Advance Settings**.

11 Select **Basic** and then **Management Wi-Fi**. Change the **Wi-Fi SSID** to your preferred Wi-Fi name. Change the **WPA preshared Key** (or password) to a password of your choice. Click **Submit** to save your changes.

12 Click **Logout**.
Plug the extender into the desired area that you wish to extend the signal to.

Make sure there are at least 2 green arcs showing on the front of the device otherwise the signal strength is too weak.

You can now connect your Wi-Fi enabled devices to your extender.
Router setup is now complete.
Test your internet connection by going to
www.youtube.com/telkom
And just like that you can now connect your Wi-Fi enabled devices to your Wi-Fi Extender.
