

BUSINESS AT THE SPEED OF LIGHT

Migrate to High Speed, More Reliable
Fibre or LTE.

Telkom | **Business
Connexion**

Meet the future. Today.

Meet the Future Today with our Fibre Solutions.

Innovation in business happens at light speed, which is why we believe that our high-speed Fibre solutions are the key to more efficient, productive and growing businesses. With our connectivity solutions, businesses around South Africa are enjoying the benefits of digitalising their operations – from reduced operational costs and improved workforce productivity to business growth.

Business Fibre

Fibre is able to transmit information at virtually unlimited speed, with stability and reliability. The pure glass optic threads eliminate infrastructure issues and downtime that is usually experienced over copper infrastructure. The always-on quality of Telkom's Fibre offering means that Fibre is the best way to operate and build your business!

| Features of Fibre:

▶ Availability & Reliability

- Reliable Internet connection and higher data throughput provides improved bandwidth availability.
- Decrease in service downtime as cables are not prone to theft.
- Improved WAN connectivity across multiple sites.

▶ Performance

- Increased data upload speeds with reduced latency.
- Improved efficiency of data uploads to cloud environments.
- Improved efficiencies in data synchronisation.
- Enables efficient and speedy analysis of Big Data for quicker business decisions.

▶ Enablement of additional services

- Efficient use of Software as a Service applications.
- Enables virtual work environments.
- Improved Internet quality enables high definition Video Conferencing and Collaboration.
- Improved performance of voice telephony over Fibre.

Nightsurfer

Why choose Telkom Internet?

| Telkom Internet provides you with:

- An IT service upon internet account setup – we set up your domain, upload your website, set up your email accounts etc. over the phone with you.
- Discounted pricing – when you take a line and internet account from Telkom, we discount the internet portion, providing you with in-bundle internet pricing benefits.
- We provide specialised value added services tailored for business needs.
- We offer Integrated Data Service benefits that provide you with a standard mobile data allocation on your fixed-line internet products. This mobile data can be used in any mobile device (cellphone, tablet, dongle, LTE routers etc.) as a failover solution.
- • Telkom is currently the only ISP who offers free soft-capped data. This means that you can still use the internet even after you've reached your data cap.
- During times of peak traffic or network congestion, Telkom prioritises business traffic over non-business activities.

▶ Telkom provides you with a self-service portal where you can:

- View your usage.
- Manage your WiFi passwords.
- TopUp your internet account via postpaid (billed against your next month's Telkom account) and prepaid (payment via credit card) methods.
- Prioritise VoIP on your internet account – you can allocate a certain percentage of your bandwidth to voice traffic.
- Check which devices are connected to your WiFi.
- Set and reset passwords.

What you can use high-speed Fibre for:

| Virtual PBX

Features:

- Cloud-based IP PBX solution hosted on shared infrastructure.
- VoIP calls routed over high-speed broadband connection to the data centre from
- IP phone handsets.

Benefits:

- Cost-effective, as no dedicated physical IP PBX needs to be purchased or rented.
- Seats can be increased or decreased as needed.
- Access all calling features of a physical PBX.

| IP Video Telephony

Features:

- IP voice solution with video-capable handsets.
- Call-conferencing capabilities.

Benefits:

- Offers a more personalised experience during calls and accelerates decision-making.
- Helps to bridge language and cultural barriers and makes conference calling easier.
- Reduces costs and the inconvenience of travel.

| Hosted Storage & Backup

Features:

- Secure, cloud-based data storage and backup for PCs and servers.
- Data stored on virtual servers via high-speed broadband connection to the data centre.

Benefits:

- No need to procure or maintain on-site storage devices and only pay for storage capacity used.
- Peace of mind from data being stored off-site should disaster recovery be required.
- Fully-encrypted transfer and storage with anytime retrieval via Internet connection.

| Video Conferencing and Collaboration

Features:

- Video-conferencing system based at premises or on the cloud.
- Operates over a high-speed broadband connection directly to the internet or to the Telkom data centre.

Benefits:

- Saves on time and travel costs as multiple participants can meet remotely and view presentations simultaneously.
- With the hosted version there is no need to purchase video conferencing system and can be used on a pay-per-use basis.
- Smaller business's can broaden business interactions, increasing exposure and opportunities.

| Video-based Training

Features:

- A video-based training solution using HD screens or web conferencing and webinars.
- Used to broadcast training material, announcements or advertising material.

Benefits:

- Facilitator-based training without venue or trainee travel costs.
- Reach audiences countrywide through the Internet or company Intranet.
- Large amount of training can be done quickly and effectively.
- Web-based solution allows for trainees to access training via web browsers.

| Video Surveillance

Features:

- CCTV security system connected via high-speed broadband connection.
- Cloud-based with footage being streamed and analysed in realtime to trigger alarms and detect threats.

Benefits:

- Detect threats before they become dangerous situations.
- Enables faster response times.
- Cloud-based so no need for on-site storage devices.
- Remotely accessible from anywhere that has an Internet connection.

| Streaming Digital Content Signage

Features:

- Digital content streamed via high-speed connection.
- Centrally controlled content for advertising, promotional campaigns and event usage.

Benefits:

- More dynamic, flexible and customisable than printed signage.
- Creates a richer more exciting interactive experience for customers.
- Reach wider audiences in a more effective way.

| Cloud Services & Unified Communication

Features:

- Remotely access software, hardware and applications via high-speed broadband connection to the data centre.
- Unified Communication is on premises or cloud-based presence, instant messaging, mobility, conferencing, collaboration and telephony.

Benefits:

- A flexible and scalable rental model that can be initialised or terminated as required.
- No need to purchase hardware, platforms, software or licences.
- Remotely sharing documents allows for collaborations from anywhere.
- Smaller businesses can operate like larger ones without incurring

| Get connected in a flash. With LTE and LTE-Advanced

▶ LTE (Long-Term Evolution)

- LTE offers up to 90Mbps download speeds that will significantly improve your internet experience whilst LTE Advanced is the next generation of LTE offering even faster speeds of up to 150Mbps download speeds.
- Telkom LTE and LTE-A is SA's leading commercially available mobile broadband and is only available on Telkom's network. Imagine your whole office connected without compromising on speed or latency.

| LTE benefits

Download at the drop of a hat:

- Download at speeds of up to 150 Mbps, thanks to superfast wireless broadband , resulting in a superior user experience.

Connect wirelessly:

- Plug-and-play technology means that there are no delays in waiting for installation, meaning you can WiFi your business in seconds and never worry about downtime due to copper theft.

Bundle it:

- Get more for less with the largest data bundles on the market at highly competitive prices.

Night Surfer:

- Get double your data with Telkom's Night Surfer for use between 12am and 7am.
