Create a new internet profile

How to create a new profile for Android devices

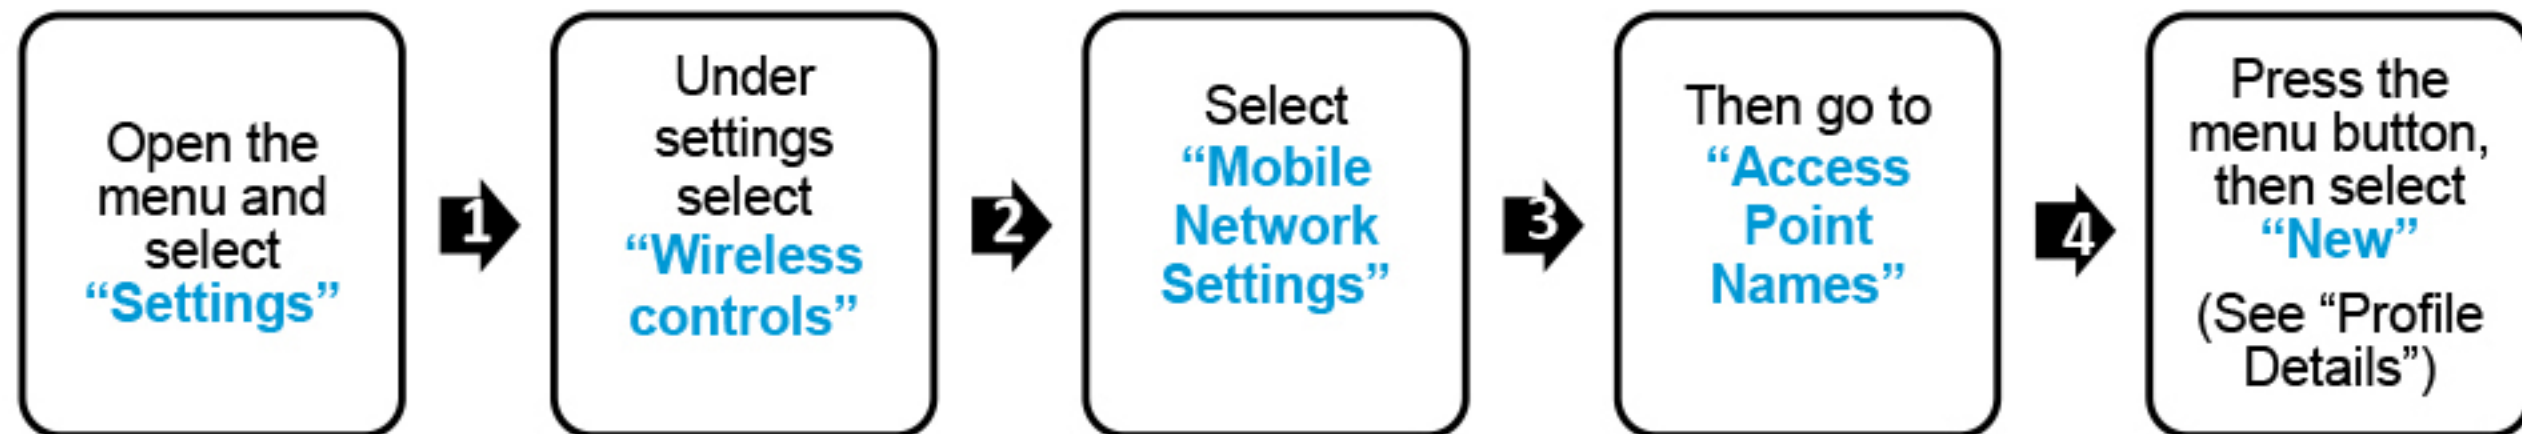

Telkom

How do I create a new profile on my Android phone?*

Creating a new profile

(This works best if the above settings are correct and you still cannot connect to the Internet)

After creating the Internet Access Point Name (APN), create another one for MMS **following the above steps**

Select "Save"

Then go back to the access point menu and **select the profile you just created**

**Please note: some menu options may differ for different Android phones*

How do I create a new profile on my Android phone?*
